

RAPID WALL

FOUNDATION SYSTEMS

Engineered for Energy Savings

ATLASEPS X-GRADE® EPS FOAM

Rapid Wall features ThermalStar® X-Grade® EPS foam by ATLASRPS.

- Designed for below grade and backfill applications
- Termite resistance with integrated termiticide
- 20 year R-value Warranty
- Third party tested by UL to assure consistent quality

CORNER KIT

The newly patented Corner Kit from Rustique offers both improved finished appearance and faster installation.

- No V cut on foam backer to facilitate making corner bends
- Only straight cuts are necessary reducing installation time
- Start installation at any point on the unit without worry for a finish seam
- Provides a tailored appearance to finished home

UNDER MOUNT TRIM KIT

Rustique has developed an Under Mount Trim Kit for the Rapid Wall panel. This kit provides the following features for mounting under the home.

- Allows installation to be in compliance with HUD regulation 3285.504 that requires no attachment to the side of the home
- Corner Kit included to eliminate cutting for corner bends, only straight cuts required
- Finished installation gives the home a tailored foundation appearance
